PROFESSIONAL SUMMARY

Accomplished Lead Engineer with 6+ years of experience architecting and delivering enterprise-grade, high-performance applications. Expert in NestJS, Node.js, and Microservices architecture with a proven record of implementing event-driven systems using Kafka, Redis, and PostgreSQL. Strong full-stack capability (React.js, Next.js) paired with cloud integration expertise (AWS, Azure). Currently leading backend architecture at HCLTech, driving scalable solutions for enterprise workflows.

CORE TECHNICAL SKILLS

Back-End	Node.js, NestJS, Express.js, PHP (Laravel), Python, Java
Front-End	React.js, Next.js, Redux, Ant Design (ANTD), Bootstrap, HTML5, CSS3
Databases & ORM	PostgreSQL, MongoDB, MySQL, DynamoDB, Prisma, TypeORM
DevOps & Tools	Docker, AWS (Lambda, S3), Kafka, Redis, RabbitMQ, Elasticsearch, Nginx, Jenkins, Git
Architecture	Microservices, Event-Driven Architecture, RESTful APIs, SSO (Azure AD)
Auth & Security	OAuth 2.0, Google Passport, Azure Active Directory (SSO), Azure DevOps APIs

PROFESSIONAL EXPERIENCE

HCLTECH | Lead Engineer

Apr 2025 – Present

Outcome Tool — Internal Ticketing & Enterprise Performance System

- ▶ Architected the complete backend system using NestJS and PostgreSQL to track sales KPIs and enterprise-level workflows at scale.
- ▶ Implemented Kafka-based event-driven architecture for high-throughput ticket processing and real-time notification dispatching.
- ▶ Optimized system performance by integrating Redis for dashboard metrics caching, significantly reducing database query load.
- ▶ Integrated Azure Active Directory (SSO) and Azure DevOps APIs for secure enterprise authentication and seamless workflow syncing.

Qburst Technologies | Engineer

Jun 2023 – Mar 2025

RM App — Interview & Review Management Platform

- ▶ Managed end-to-end development of a client interview tracking system using Node.js and Prisma ORM.
- ▶ Engineered secure authentication workflows using OAuth 2.0 and Google Passport modules.
- ▶ Utilized AWS S3 for secure document storage and built a Google Docs history module for audit trails.

Agira Technologies | Software Engineer

Sep 2022 – May 2023

Medical App — Home Healthcare Platform

- ▶ Developed a home-based medical testing platform using NestJS and TypeScript.
- ▶ Integrated Elasticsearch to optimize search queries and eliminate duplicate data entries at scale.
- ▶ Built a custom PDF generation engine using Puppeteer for automated, branded purchase receipts.

IT Krish Technologies | Software Developer

Sep 2020 – Aug 2022

Student ERP — Educational Management System

- ▶ Primary developer for a full-stack educational ERP handling both React.js (front-end) and Node.js (back-end).
- ▶ Engineered dynamic UI with Ant Design and managed complex application state using Redux.
- ▶ Developed an automated question paper generation module using Puppeteer (HTML → PDF).
- ▶ Integrated Google Drive API for cloud storage, Razorpay API for secure payments, and Jitsi for virtual sessions.
- ▶ Built interactive data visualizations with Chart.js for real-time academic analytics.

EDUCATION

B.E. in Electronics and Communication (ECE)

69.95%

Paavai College of Engineering

CERTIFICATIONS

- ▶ Full Stack Development Certification
- ▶ Advanced Diploma in Java & Python Programming (CSC)

Open to Senior / Lead Engineer roles | 15–25 LPA | Chennai & Remote
